Technologies Used

HTML

As we know html is used to make pages for any website.

I have used html to give outline and also to add some features in our project. I have also done many thing like positioning of sign up form and many more using html.

CSS

As we know that CSS is used to design the pages and look the page more beautiful and handy. So i have used CSS to design the pages and to make our pages look more beautiful and attractive.

I have also added colors and images using CSS and many more.

About Project

Make Sign in Page

In this project i have learned to create a sign in page for school examination system.

For example if anyone wants to give exam online they have to sign in using their credentials and then they can give the exam, so i have created the same sign in page.

Objective of this Project

I have created this project to ease the examination system.

If anyone wants to give their exam they have to login using their credentials and then they can give their exams.

It will help students as well aas the person or authorization who will conduct the exam.

Description of the Project

First I have created this website to ease the examination system of any school or collages who are using the traditional method to conduct the exams.

In this I have used html and css to make this beautiful project.

HTML has been used to give a rough outline to the project and CSS has been used to make this project more beautiful.

<header style="font-size: 40px; margin: 40px; color: brown;"><u>ONLINE EXAM

PORTAL</u></header>

This type of codes which includes both html and css has been used to make it more beautiful.

background:url("https://images.unsplash.com/photo-1472289065668-ce650ac443d2?ixlib=rb   4.0.3&ixid=MnwxMjA3fDB8MHxwaG90by1wYWdlfHx8fGVufDB8fHx8&auto=format&fit=crop&w=20 69&q=80") ;

Also for background images i have added this type of codes.

```
<a style="background-color: rgb(15, 232, 236);"
href="#"><button>Student
Management</button></a><br><br>
```

For making buttons more beautiful and for changing its background, this type of code has been used.

I have worked very hard to make this project.

So the final outcome came very beautiful and we are able to create a beautiful sing in page for online examination system.

Thanks…….
